Education

Pennsylvania State University, BS in Computer Science

Graduated: December 2024

- **Coursework:** Data Structures, Algorithms, Software Engineering Design, Advanced Programming, Computer Architecture, Formal languages, Compiler Construction, Operating Systems, Data Management

Technologies and skills

Languages: Python, Java, JavaScript, HTML, CSS, SQL

Frameworks/ Libs: Django, Django Rest Framework, Spring Boot, React, Tailwind

Databases: MySQL, PostgreSQL, sqLite, MongoDB

Tools: GIT, Github Deaktop/CLI, Postman, VsCode, PyCharm, Render, Netlify, Wordpress

Experience

Software Developer Internship, Mobileware Technologies – Mumbai, MH

June 2023 – Aug 2023

- Developed backend features for automotive insurance software using **Java** and the **SpringBoot** framework to create **CRUD RESTful APIs**.
- Implemented a repudiation dispatch management system for duplicate customer tickets, a file record management system allowing employees to access searchable insurance claims, and a claim file verification system to ensure accurate client submissions by **validating user input**. The enhancements **streamlined searches** of the claims and significantly **reduced user errors**.
- Created **software design documentation** and **communicated** with manager/project-lead.
- **Debugged** code using **JUnit testing** and utilized **Postman** for **API testing**.

Co-founder, Lion Rentals – Harrisburg, PA

Aug 2023 – Aug 2024

- Designed and launched student rental services (car sharing and storage) using **WordPress** with **VikRentCar plugin** and **Wix**, automating operations and generating **more than \$5,000 in sales** in summer of 2024.
- Participated in **business planning** and **secured partnerships** with housing departments on Penn State campus which **increased sales** and increased brand awareness.

Projects

YouNote AI – Python, Django, HTML, Tailwind CSS, JavaScript, PostgreSQL, Render

Github | Demo

- **AI** note taking platform, integrating **OpenAI API** and **AssemblyAI API** services to transform any topic or YouTube video into study notes. Allowing users to **save**, **edit**, **delete** notes and view them with **markdown** file format and styling via marker.js.

OpenForum – Python, Django, HTML, CSS, JavaScript, sqLite, Render

Github | Demo

- A social platform enabling users to **host**, **join**, and **message** in topic-specific discussion rooms for collaboration and exchange. With secure user authentication for posting, deletion and room creation privileges.

Mini-C Compiler – Java, JFlex, BYACC/J

Github

- Programmed a compiler for "mini-c". Built on Java using **compiler construction tools**, JFlex (for **lexical analysis**) and BYACC/J (for **parsing**). The compiler parses the source code written in "mini-c", performs **semantic analysis** to catch errors, and then executes the program directly.
